Education & Training

CITE College / Purbanchal University

Kathmandu, Nepal

Bachelor of Information Technology

CGPA: 3.71

- Among top 5% of the batch
- Relevant coursework in C, C++, Java, Web Technologies, AI, ML, etc.

eSatya

Kathmandu, Nepal

Blockchain Fellowship

- Learned core blockchain concepts including smart contracts and decentralized applications.
- Developed strong teamwork skills and an understanding of transparent, impact-driven blockchain solutions.

College Projects

- **[Sajilo Aawas](#)**: Sajilo Aawas is an online room and rental management platform that connects tenants directly with property owners. The system is designed to make the rental process faster, easier, and more transparent by offering smart search and location-based room recommendations. It uses a dictionary lookup method for efficient data handling and the KNN (K- Nearest Neighbors) algorithm to identify and recommend nearby rooms based on the user's location.

- **[Fashion Product Recommender System](#)**: This project is built using Python and Django and recommends fashion products based on an image uploaded by the user. The system analyzes the uploaded image and suggests similar fashion products by extracting visual features using ResNet-50. Additional techniques such as CNN for feature learning and KNN for similarity matching are used to generate accurate recommendations.
- **[Smart Car](#)**: This is a hardware-based project developed using C++ that detects obstacles with the help of sensors and automatically avoids them by changing direction. The system enables the smart car to navigate safely without human intervention.

Interests

- **Languages**: English, Nepali, Basic German
- **Hobbies**: Playing, Camping, Video Games
